

Ethics Policy

International Journal of Education and Psychological Research (IJEPR) has a well-defined Ethics policy. The Ethics are explained as:

Authorship of the paper: Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported study.

Originality and Plagiarism: The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others that work this has been appropriately cited or quoted. Authors must be honest in presenting their results and conclusions of their research. Research misconduct is harmful for knowledge. It could mislead other researchers.

Research Results: Fabrication, falsification or selective reporting of data with the intent to mislead or deceive is unethical, as is the theft of data or research results from others. The results of research should be recorded and maintained to allow for analysis and review. Following publication, the data should be retained for a reasonable period and made available upon request. Exceptions may be appropriate in certain circumstances in order to preserve privacy, to assure patent protection, or for similar reasons.

Data Access and Retention: Authors may be asked to provide the raw data which has been used for the study presented in the paper for editorial review, and should be prepared to provide public access to such data.

Acknowledgement of Sources: Authors should acknowledge the work of others used in their research and cite publications that have influenced the direction and course of their study.

Reporting Standards: Authors of reports of original research should present an accurate account of the work performed as well as an objective discussion of its significance.

Use of patient images or case details: Studies on patients or volunteers require ethics committee approval and informed consent, which should be documented in the paper.

Multiple, Redundant or Concurrent Publication: An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication.

Corrections and Retractions: All authors have an obligation to inform and cooperate with journal editors to provide prompt retractions or correction of errors in published works.

- The journal will issue retractions if:
 - There are clear evidence that the findings are unreliable, either as a result of misconduct (e.g. data fabrication) or honest error (e.g. miscalculation or experimental error);
 - The findings have previously been published elsewhere without proper cross-referencing, permission or justification (i.e. cases of redundant publication);
 - It constitutes plagiarism;
 - It reports unethical research.
- The journal will issue errata if:
 - A small portion of an otherwise reliable publication proves to be misleading (especially because of honest error);
 - The author list is incorrect (i.e. a deserving author has been omitted or somebody who does not meet authorship criteria has been included).

Other forms of misconduct include failure to meet clear ethical and legal requirements such as misrepresentation of interests, breach of confidentiality, lack of informed consent and abuse of research subjects or materials. Misconduct also includes improper dealing with infringements, such as attempts to cover up misconduct and reprisals on whistleblowers.

The primary responsibility for handling research misconduct is in the hands of those who employ the researchers. If a possible misconduct is brought to our attention, we will seek advice from the referees and the Editorial Board. If there is the evidence, we will resolve the matter by appropriate corrections in the printed and online journal; by refusing to consider an author's future work, for a given period, and by contacting affected authors and editors of other journals.

Minor misdemeanours may not lead to formal investigations, but are just as damaging given their probable frequency, and should be corrected by researchers.

Disclaimer

The accountability of the research matter published in International Journal of Education and Psychological Research (IJEPR) is entirely of the author(s) concerned. The views expressed in the research papers/articles may not essentially correspond to the views of the publisher/editor. The publisher/editor will not be liable for any mistake or consequences arising from the exercise of information contained in it.
